

Wall Mount Hydroxyl Generator

Model: WLMT2UA
WLMT2EA

A great choice for smaller spaces that require quiet performance. Designed to continuously cleanse air and surfaces in offices, hotel rooms, medical offices or homes. Especially medical or dental offices, or other spaces with frequent visitors or occupants that need to be protected from frequent exposure to large numbers of people. Atmospheric hydroxyl radicals (hydroxyls) destroy bacteria, virus, mold and volatile organic compounds (VOCs). The Wall Mount unit can be used continuously in occupied spaces to improve health and safety by destroying pathogens (virus, bacteria and mold), harmful VOCs and odors are important. Any space where indoor air quality is important can benefit from hydroxyls.

Hydroxyls are a naturally occurring oxidizer. Radical Clean Solution's photolytic hydroxyl radical production mimics the natural process that occurs within Earth's troposphere. A green solution that uses no added chemicals and leaves no residues. No toxic or harmful substances are used or generated. Safe for people, animals and plants; all have evolved in a hydroxyl-rich environment.

SPECIFICATIONS BOX	Model:	WLMT2UA/EA
	Area Treated:	1,500 ft ² (to 140 m ²)
	Dimensions:	28 x 19 x 6 inches (71 x 48.3 x 15.2 cm)
	Weight:	14 lbs (6.35 kg)
	Input Voltage-Amps	120 VAC 60 Hz -1.5 amp or 220 VAC 50 Hz- 3.0 amp
	Control:	Switch and SmartHydroxyl™
	Noise Level:	-45 dB Max
	Number of Optics:	2
	Fan Rating:	200 cfm

Purify-Sanitize the Air We Breathe

RCS Hydroxyl Generator Systems

NEUTRALIZES UP TO
99.9999%
of Tested Virus

**Corona Virus
TESTED**

**HELPS
with Asthma
& Allergies**

FULL Air & Surface Protection

SAFE for Humans, Pets and Plants

RCS hydroxyl generator systems neutralize and destroy bacteria, virus, mold and VOCs in air and on surfaces safely and effectively. Pathogens are destroyed within the equipment due to exposure to high doses of UV energy. More importantly, hydroxyls leave the equipment and produce additional radicals in a cascading fashion. In this way, the air and surfaces within a space will be rid of pathogens and VOCs.
